

## Notice to graduates of accounting diplomas

If you have graduated from a co-op accounting diploma by (or in some cases, a regular accounting diploma but have accounting experience), you may wish to apply to the first semester of the third year of the degree program as an advanced student to start May. The first semester of the third year is also available for a September start for students without accounting experience.

Graduates of Conestoga's three year program will be required to complete bridge modules for some courses to be qualified to enter the degree as an advanced student. Those modules are normally completed in the semester before starting the degree.

Graduates of other accounting programs may have a combination of bridge modules and full courses to qualify to enter in Year 3. If you are a graduate of other programs, you will need an individualized program. Contact Debra Good at [dgood@conestogac.on.ca](mailto:dgood@conestogac.on.ca) for counseling.
